

FRANKLIN FIRE DEPARTMENT

RESIDENTIAL KEY BOX PROGRAM

The Franklin Fire Department has partnered with the vendor Emergency Access Systems to offer a key box for residential use. This small key box is compact and perfect for homeowners. Specifically, the department sees this device used in residential buildings where a person uses a “Life Line” or similar alarm product that is monitored by a central station alarm company. The key box will give firefighters and paramedics quick access into buildings where time critical services may be required.

These units are priced at \$175.00 for a door hung model and \$169.00 for a surface mounted product. A shipping and handling charge may apply. Once the Key Box is installed in an approved location, the Fire Department will lock the key into the box. The Franklin Fire Department is the only

agency with a key to this key box.

For more information or to obtain an order form contact the Franklin Fire Department at 508-528-2323 or visit the vendors website at www.easkeyboxsystems.com
